Our Mission

A grayscale background image featuring a large globe in the center. Surrounding the globe are various elements representing the Air Force's mission: a fighter jet in flight, a satellite in orbit, a missile launch, and a group of personnel in the foreground. The entire scene is set against a backdrop of clouds and a bright light source.

U.S. AIR FORCE

Lessons Learned

- **Online document control and training is the most efficient way to reach entire work force**
- **Keep the number of objectives and targets small – maintain management focus on the most critical issues**
- **EMS is perceived as an environmental program versus an installation-wide program management system**
- **Limited personnel resources, personnel turnover, unit deployment, and lack of time**
- **Senior management support and interest is crucial to a successful EMS**

U.S. AIR FORCE

Conclusion

- **Finalize/publish AFIs for EMS and ESOHCAMP**
- **Finalize/publish EMS Playbook**
- **Continue to work on integrating EMS and Natural Infrastructure Management (NIM)**
- **Develop holistic installation performance measurement scorecard (EMS, NIM, LEEDs, Energy)**
- **Implement management system-focused streamlined ESOHCAMP**
- **Installations incorporate EO 13423 goals as EMS objectives**
- **Develop and deploy IT Tool**
